# ABOUT US

In our careers we analyzed thousands of cyber attacks while serving many of the world's leading corporations and organizations.

We've successfully completed hundreds of assignments, each unique in scope and context, helping our clients to make the right decisions.

Our great experience in the field of Cyber Security and our flexible approach distinguish us as Trusted Advisors for our Clients.

## OUR MISSION

We support Companies and Institutions to correctly define their Cyber Defense strategy, to optimize their Cyber Security budgets and fine-tune their ROSI (Return On Security Investment) by understanding what's really happening on the field and their actual, specific threat model.

# WHY US

We have collected and are managing the world's largest repository of successful cyber attacks from open sources: in total, we have analyzed over 16,000 incidents since 2011.

Our data is used by organizations and Institutions to evaluate *what really happens* in the quickly evolving Cyber landscape, where defenses have failed and to correctly define the strategies for an effective protection against Cyber Threats.

# OUR GOALS

We proactively help organizations all over the world to understand and manage the Cyber Threat landscape

- Provide Institutions and Research Centers with information on what really happens in Cyber Security
- Deliver data on cyber incidents to Insurance companies
- Helping companies to develop their custom Security strategy optimizing Cyber Defence budgets
- Support small and medium businesses to manage their Cyber Security
- Raise awareness on Cyber Security issues

# OUR SOLUTIONS

## REPORTS AND INSIGHT ON CYBER ATTACKS DATA

We support Research Centers, Institutions and Insurance companies with exhaustive and custom reports

## CYBER SECURITY STRATEGY ASSESSMENT

We raise the level of Cyber Security by fine-tuning the strategy that best suits the specific needs of our Customers

## DARK WEB AND CYBER REPUTATION MONITORING

We offer timely and up-to-date information about cybercriminal activities in Dark Web

## CYBER SECURITY AWARENESS AND TRAINING

We provide custom Cyber Security Awareness Trainings to educate about safety and security online

# REPORTS AND INSIGHTS ON CYBER ATTACKS

At Hackmanac, we provide comprehensive data and statistics on real and successful cyber attacks. Our team analyzes and classifies information from multiple open-source sources on both the Clear and Dark Web to deliver accurate and reliable insights.

We offer **fully customizable Reports** to meet the specific needs of our clients and provide valuable insights into cyber attacks. Our clients include **Research Centers, Institutions, Organizations, Insurance companies, and Public and Private companies.**

Our reports incorporate a wealth of information on cyber attacks, including details such as the type of attacker, target merchandise sector, attack vector, severity and impact of the attack, geography of the victims, trends, and much more. By providing this level of detail, we help our clients stay informed and take proactive measures to protect their digital assets.

# DARK WEB AND CYBER REPUTATION MONITORING

Hackmanac provides reliable and verified information on cybercriminals activities in the Dark Web. Our team carefully handpicks data from criminal websites, forums, and channels to avoid false positives and ensure that our information is accurate and up-to-date.

We offer a free daily bulletin called "*Hacks of Today*" (*HOT*) on our social media accounts. This bulletin summarizes our latest discoveries and provides valuable insights into potential security threats.

We also provide a Cyber Reputation Monitoring service to **Private and Public companies, Professionals, Organizations and Institutions**. With our data, we can offer accurate and timely information on any security violations and help our clients take proactive measures to protect their digital assets.

# CYBER SECURITY STRATEGY ASSESSMENT

In today's digital landscape, developing an effective and efficient Cyber Security strategy is paramount. However, there is no one-size-fits-all solution for every company.

*A customized approach* is necessary, taking into account factors such as company size, tools and working methods, level of acceptable risk, industry-specific threats, existing Cyber Security solutions, usability, scalability, and budget.

At Hackmanac, our goal is to **elevate the overall level of Cyber Security** by carefully reviewing and fine-tuning a strategy that best suits the specific needs of our customers. We work closely with our clients to understand their unique requirements and design a *tailored Cyber Security strategy* that effectively mitigates risks and maximizes protection.

# CYBER SECURITY AWARENESS TRAININGS

In a world where cyber attacks and risks are becoming increasingly prevalent, it is crucial to promote Cyber Security Awareness initiatives to educate people and organizations on how to protect themselves online.

With cyber threats constantly evolving, staying informed and up-to-date is a top priority for both small and large companies. At Hackmanac, we are committed to supporting this important cause by providing custom Cyber Security Awareness Trainings, up-to-date data on Cyber Attack scenarios, and free Cyber Security resources through our Dashboard and Download area.

We believe that by educating people and organizations on the importance of Cyber Security, we can help mitigate the risks and promote a safer online environment. We deliver customized training solutions and expert insights to keep you informed and prepared for potential cyber threats.

# OUR RESOURCES

■ Cyber Attacks Dashboard: on Hackmanac website, to check a sample of our cyber attacks data and analyze global trends
