

Hackmanac launches HackRisk.io, an innovative Cyber Threat Monitoring platform

[Dubai, 10 July 2024] - Hackmanac is pleased to announce **HackRisk**, a state-of-the-art web dashboard designed to provide highly segmented data on the thousands of cyber-attacks that occur every year around the world.

This new platform provides detailed, up-to-date information on cyber-attacks, attackers, victims and attack types, and offers tailored subscription plans for researchers, journalists, companies and institutions.

What really sets this platform apart is the introduction of our **ESIX© (Estimated Severity Index)**. This unique data-driven index is the first of its kind and is the result of years of dedicated research by the Hackmanac team. ESIX© is designed to help organisations update their cyber defence strategies by providing timely, accurate and actionable data on thousands of harmful cyber attacks and their impact analysis.

It not only estimates the damage of each attack, but also allows different attacks to be compared based on the victim's industry, geographic location, attacker group profile, etc.

Designed to inform board-level decisions and support the work of GRC, cybersecurity, business continuity and enterprise risk management teams, ESIX© provides unique situational awareness of the real-world impact of cyber attacks on their victims.

"Our team has put a lot of effort into this project, and I am proud of what we have achieved over the past 5 years," said Sofia Scozzari, CEO of Hackmanac.

"We help organisations around the world reassess their cybersecurity strategies based on the most up-to-date and relevant information about real, actual cyber threats.

Our new platform provides a clear, accurate and realistic picture of the potential risks faced by different industries in different geographies, enabling the design and implementation of more effective, sustainable and targeted defences."

The platform is now available free of charge for a limited period. To find out more, visit <https://hackrisk.io>.

About Hackmanac

Founded in Dubai in 2020 by world-class cyber security thought leaders, Hackmanac's extensive experience and innovative solutions make it a strategic, trusted advisor to businesses and institutions.

With our unique blend of strategic, managerial and technical expertise, and our constantly updated threat research, we can provide clients with bespoke reporting and analysis, threat monitoring and security awareness services to help them review and optimise their cyber security strategies, policies and budgets.
